

Technical drawing of a ring-shaped part. The top view shows an outer diameter of 580, an inner diameter of 380, and a thickness of 100. The side view shows a total height of 416, with a central section of 82.8 and two side sections of 188.2. The bottom view shows a total width of 416, with a central section of 82.8 and two side sections of 188.2. The part is labeled with dimensions and material specifications: $\phi 4-12$ and $\phi 4-5$.

Technical drawing of a cylindrical component with a flange. The top view shows a circular flange with an outer diameter of 580 and an inner diameter of 500. The side view shows a cylinder with a height of 200. The flange has a thickness of 40. The drawing includes dimension lines and labels for the diameters and height.

Technical drawing of a circular component, likely a flange or a cover plate, showing two views: a top view and a side view.

Top View:

- Overall diameter: 580
- Inner diameter: 500
- Flange thickness: 40
- Four small holes are located on the outer edge of the flange.

Side View:

- Overall diameter: 580
- Inner diameter: 500
- Flange thickness: 40
- Height of the component: 400
- The side view shows a cross-section of the component, revealing a central cavity and a semi-circular feature at the bottom.
- Four small holes are located on the outer edge of the flange, with dimensions $\phi 4-12$ and $\phi 4-6$ indicated.
